

BOTTLE JACK ADAPTER

Directions to raise rear of GMCMH at bogie:

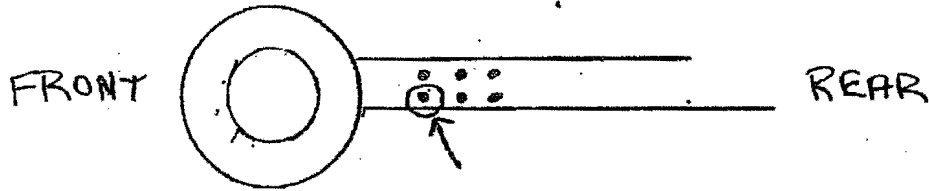

On the underside of the rear bogie there is a slit opening. Place the bottle jack adapter so that the hook is fully seated in the slit and moved forward towards you so that it engages the front lip of the slit in the bogie. Refer to diagrams.

Please use jack stands for safety.

BOTTLE JACK ADAPTER

Directions to raise front of GMCMH:

Just to the rear of the front wheel are six bolts which connect the front frame rail to the side frame rail. Inside of the most forward lower bolt is a hole in the frame.

Follow the diagrams below. Place the tip of the jack adapter into this inside hole and swing the jack pad up and out. Please use a jack stand for safety.
